SimplyMap™   Powerful Data, Professional Results

Getting Started with SimplyMap

Step 1: Organization Login

In order to use SimplyMap, you must first log into your organization's account. There are two ways to log into an organization account:

(a) manually login using an organization username and password (Geographic Research provides this information in your trial account e-mail), or

(b) if your organization has provided us with the appropriate information, we can automatically login users based on the IP address of the computer being used

This means that some users will have to enter an organization username and password, while others will only enter personal workspace login information.
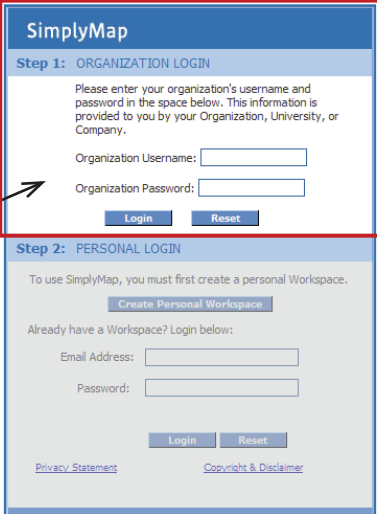

Step 2: Personal Workspace Login

Once you log into your organization's account you then create a personal workspace. To create a workspace, click on the "create personal workspace" link on the login page.

In the create workspace box, enter your e-mail address and password, and click "Register". **A confirmation e-mail will then be sent to your e-mail address.** If you do not receive this e-mail within two minutes, please check your SPAM folder.
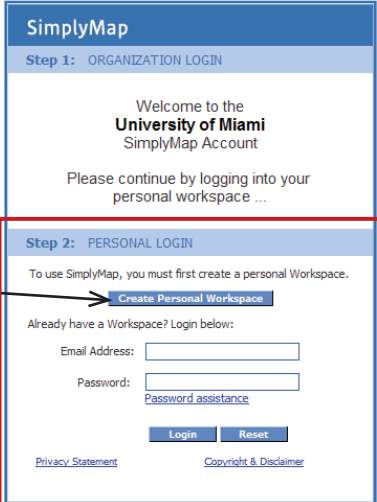

Click on the activation link in the confirmation e-mail, and your account will be activated and ready to use. You may now go back to the personal workspace login page, enter your e-mail address and password, and start using SimplyMap!

If you have any questions, please e-mail us at:
