

Guide to USGS Topographic Maps

1:24,000 maps are divided between current editions and old editions and are organized alphabetically by state and quadrangle name. An index is available in the top drawer of each state section. Determine the quadrangle name from the index.

1:62,500 Maps are located at the far end of the back row of the USGS section. The indexes for each state are at the top of each drawer.

1:100,000 and 1:250,000 Maps are in the first row of the USGS section. They are filed by quadrangle name, not by state. Indexes are found in the top drawer of each set.

1:31,680 and 1:125,000 and 1:250,000 Old Series maps are located on the opposite side of the first section. They are filed by state and then quadrangle name.

Minnesota USGS Maps:

Current Edition 1:24,000 are located in the Minnesota collection near the circulation desk.

Minnesota Old Editions and 1:62,500 are filed with the rest of the old editions in the back row of the USGS section.

A USGS Topographic Map Symbol Guide can be found on top of the filing cabinet near the USGS section.
